FOR IMMEDIATE RELEASE

Introducing Floor Care Safety for Vancouver...

The Safe Solution® Anti-Slip Treatment System and Clean Step™ Multipurpose Cleaner, a proven way for business owners to minimize their exposure to slip and fall accidents, injuries, and lawsuits!

VANCOUVER, BRITISH COLUMBIA, CANADA (February 24, 2020) – Vancouver Floor Safety, the GFSN Business License Holder of the Global Floor Safety Network for Vancouver, announces the launch of their new Floor Care Safety business for the City of Vancouver.

The Global Floor Safety Network and its licensed operators are considered to be one of the world's foremost leaders in advanced anti-slip traction enhancing technology.

ABOUT VANCOUVER FLOOR SAFETY:

Vancouver Floor Safety is licensed by Global Safe Technologies Inc. and is the exclusive Global Floor Safety Network ("GFSN") licensee, providing the Safe Solution Anti-Slip Treatment System, Clean Step Multipurpose Cleaner, and all other related products manufactured by Global Safe Technologies Inc., in the City of Vancouver, Canada.

Vancouver Floor Safety is based in Vancouver, BC, and is owned and operated by Mr. Noel Keith.

ABOUT OUR PRODUCTS AND SERVICES:

The Safe Solution® Anti-Slip Traction Restoring & Enhancing System ("TRES™") is an INVISIBLE, NON-COATING APPLICATION that is BIO-DEGRADABLE and ENVIRONMENTALLY SAFE, and is a proven and superior anti-slip formulation that deep cleans and restores

"Cleaner is Safer™"

traction on hard mineral surfaces, such as ceramic tile, porcelain tile, granite, and cement surfaces. The Safe Solution® is certified tested and meets and exceeds all Coefficient of Friction (“COF”) requirements and specifications. The Safe Solution® is a proprietary anti-slip formula that was developed for Don Dafoe in 1989 by the BC Research Institute at the University of British Columbia, and is approved for use by the Canadian Food Inspection Agency (“CFIA”), since May 2001.

Clean Step™ Multipurpose Cleaner, Degreaser, and Sanitizer is an integral part of your daily cleaning regimen and is the only cleaner we recommend as your daily cleaner to maintain all Safe Solution® anti-slip treated surfaces, and is an excellent standalone cleaner for all types of floors in maintaining a safer and cleaner condition. Clean Step™ replaces a number of cleaning products that you may be using today, and with Clean Step’s added anti-bacterial benefits, customers and employees are automatically protected from a number of harmful and potentially deadly bacteria and viruses (such as the influenza and HIV viruses) as part of your normal daily cleaning process – in most cases no separate sanitization step is needed.

Clean Step™ is environmentally safe and is Health Canada approved.

Floor Care Safety Program® (“FCSP™”) - for maximum protection and the utmost in anti-slip floor care safety and cleanliness, we recommend our Floor Care Safety Program® with our 5 year price guarantee. We will provide regular written inspections, annual Safe Solution® Anti-Slip TRES™ Rejuvenations and our Clean Step™ Multipurpose Cleaner, all offered at a reduced price, and guaranteed under our FCSP™ not to increase for 5 years.

Our Safe Solution® anti-slip treatment system, and our Clean Step multipurpose cleaner, have been extensively field tested in both commercial and residential applications including: • Major Cities • Recreational Facilities • Pools and Spas • Hotels • Restaurants • Office and Residential Buildings • Shopping Malls • Property Management Companies... and more.

Our firm belief, echoed by most in the industry, is that a cleaner floor is a safer floor. Our motto is *“Cleaner is Safer™”*. While this is true, there are a number of wear and tear factors where the specified Coefficient of Friction (“COF”) of the tile will be reduced to a level that is hazardous for walking on over a period of time. This drop in COF can be attributed to a wide range of factors, such as: tile wear, inappropriate surface treatments such as coatings, waxes, harsh cleaning chemicals, bleaches, improper cleaning and maintenance methods, contamination and residues from other cleaner types, contributing to the buildup and trapping of grease, fats, dirt, etc., as well as the normal wear of the tile itself due to pedestrian traffic levels. Once the COF has been reduced to an unsafe level for a safe walkway surface, an anti-slip treatment process is necessary to ensure “sure footedness” and compliance with all Coefficient of Friction standards.

And because most of the wear and tear issues listed above are relatively difficult to control precisely over a period of time, is the reason why we developed our Floor Care Safety Program® – that when followed, will maintain the utmost in cleanliness and safety, ongoing, and for years to come.
